Yes, feel free to purchase this package if your child is 6 months old or younger.

What happens if I don't schedule a session at one of the 3 month intervals?

These are not hard and fast intervals. They are goals to help you plan on scheduling the sessions since these are good times to record the rapid changes in a baby's development.

How many people are allowed in the sessions?

These sessions are designed primarily to record the baby's development. If you have more children and you desire portraits of them, then one of our other plans would be more suitable.

Who do you recommend to be in the sessions?

The baby is the center of the event. However, photographing Mom and or Dad with your baby is anticipated.

Do you bring an assistant?

Yes, if Dad or another adult isn't home I will bring an assistant. This is usually my wife or one of my children.

You didn't address all of my questions.

Please call or email and we will answer any questions you have.
